I. Corporate Governance

We consider key issues of Dentsu’s corporate governance to be development of a management structure that can respond swiftly to changes in the economic environment, a management control structure that covers our globally expanding scope of operations, and control and management functions that can employ those structures appropriately. Therefore, we strive to enhance our corporate governance in order to respond to the expectations of our stakeholders by improving corporate value.
Dentsu’s Corporate Governance Implementation Structure

Dentsu’s ultimate decision-making body is the General Meeting of Shareholders, which appoints the Board of Directors and the Audit & Supervisory Board. Effectively directed and controlled through its system of corporate governance, the company has in place a system of checks that enables it to reach rapid business-related decisions. Dentsu appoints two of its twelve Directors and three of its five Audit & Supervisory Board Members from outside the company.

Dentsu has introduced a Director and Executive Officer System to clarify roles and responsibilities and to reinforce the effectiveness of its management and operations systems. The Audit & Supervisory Board in principle meets once a month to determine policy, assign work, and check how the Directors have carried out their duties based on an audit plan.
